Simple Calculator Assignment Report

Greetings of the day..!

I had used pycharm for this assignment and output will be displayed in chrome browser.

calculatorScript.js : This file contains logic to implement the functionality of the calculator. It has the implementation of Addition, Subtraction, Multiplication, Division, modulus (%), clear screen (C), clears a single element when entered for calculation (ce).

index.html: This file contains the implementation of the front-end part of the calculator.

style.css: This file contains the code for setting background image, colour and shape etc.

Thanking you,
Jaya chandrika
